NEUROSHIELD CLINICAL TRIAL PROTOCOL - PHASE III

RESTRICTED PATIENT DATA - MEDICAL ETHICS COMPLIANCE

Page 1 Study Abstract:

Trial Identifier: NCT-04992182

Primary Investigator: Dr. Eleanor Wright (e.wright@neuroshield-trial.org)

Coordinator Hotline: +1 (555) 882-9910

Institution: Geneva Medical Science Institute

Study Overview:

Evaluating efficacy of NeuroShield-400 compound in mitigating cognitive degradation.

Total enrolled patient cohort: 450 subjects across 12 medical centers.

SECTION 2: CLINICAL EFFICACY & ADVERSE EVENTS

Page 2 Trial Results:

Primary Endpoint: Statistically significant cognitive stabilization observed in 78.4% of treatment group.

Adverse Events: Mild fatigue reported in 4.2% of subjects. No grade-4 adverse events were observed.

Authorized Data Custodian: custodian-admin@neuroshield-trial.org

Server IP: 172.16.45.10

Conclusion: Compound demonstrates favorable safety and therapeutic response.
